DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 15-18, drawn to method for positioning a cable, classified in class 244, subclass 129.1.
 - II. Claims 10-14, drawn to an apparatus for positioning a cable, classified in class 244, subclass 129.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced by another materially different apparatus or by hand.

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Ms. Odell on 1/12/03 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-9 and 15-18. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 3644

Claims 10-14 are withdrawn from further consideration by the examiner, 37

CFR 1.142(b), as being drawn to a non-elected invention.

5. Claims 1-9 and 15-18 are objected to because they contain language, which is unclear (see Paragraph #8 below).

6. This application is in condition for allowance except for the following formal matters:

7. The presence of claims 10-14 to an invention non-elected with traverse.

8. The following minor informalities are found in the claims

- Claim 1, Line 2: The phrase "such as"
- Claim 1, line 3: the phrase "such as"
- Claim 15: Line 2: the phrase "such as"

8. The following is a statement of reasons for the indication of allowable subject matter: The examiner could not find a method of running cable where the exact steps of enclosing, removing, directing and fastening all occurred within an aircraft. The prior does teach that it is known to run cables in an aircraft but is completely silent to the method in which this cable is laid.

9. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
